### Filtro antigrasso

Se situato all'interno di una griglia supporto, può essere uno dei tipi seguenti:

**Il filtro di carta** deve essere sostituito una volta al mese o se colorato nel lato superiore, quando la colorazione traspare dai fori della griglia.

**Il filtro metallico** deve essere pulito una volta al mese, con detergenti non aggressivi, manualmente oppure in lavastoviglie a basse temperature ed a ciclo breve. Con il lavaggio in lavastoviglie il filtro antigrasso metallico può scolorirsi ma le sue caratteristiche di filtraggio non cambiano assolutamente.

### Grease filter

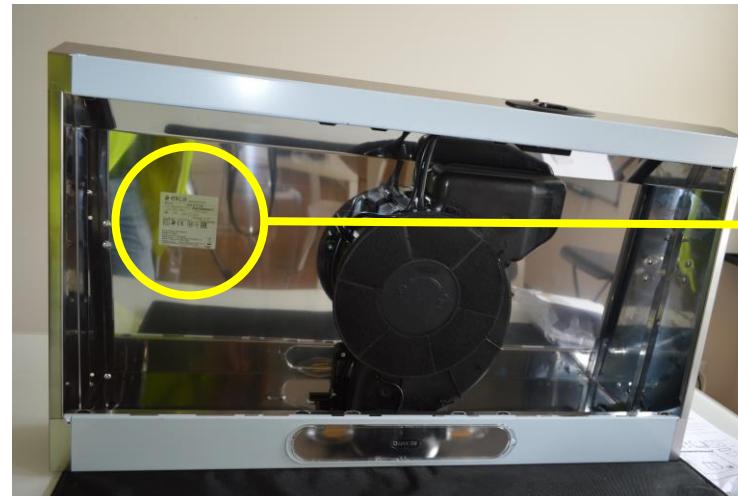

If situated inside the support grill, it may be one of the following types:

**Paper filter** must be replaced once a month or if colouring appears on upper side, in such cases the colouring is evident through the grill openings.

**Metallic filter** must be cleaned once a month, with non abrasive detergents, by hand or in dishwasher on low temperature and short cycle. When washed in a dishwasher, the grease filter may discolour slightly, but this does not affect its filtering capacity.
